Projects

Airport site

- A simple site with simple widgets like dropdowns. Written in pure html and css

Landing page (Burger)

- Adaptive website business card written using SASS, jQuery, Flex
- Using jQuery made a simple slider
- Adapted for desktop and mobile phone

Portfolio site

- Beautiful site with parallax effect written using PUG, SASS, jQuery, Vue.js, Flex, Grid
- Using Vue.js made a complex slider
- Adapted for desktop and mobile phone

Weather service

- This application shows weather data anywhere in the world using data from two reputable services
- The application has the ability to switch services
- This app has responsive design for all kinds of devices (used Bootstrap 4)
- The application stores the entered data in the local storage for 10 minutes and upon repeated access does not make a new request, but issues data from local storage
- This application written in React.js

Collections service

- This application shows user-created collections that contain specific items.
- Site visitors can view collections and see the number of likes. Users and administrators can leave comments and like.
- This app has responsive design for all kinds of devices (used Bootstrap 4)
- This application written in React.js with Redux. The server part is used Node.js (Express). Database MySQL. ORM Sequelize.

Calendar like on the Windows

- This application is an exact copy of the calendar in Windows OS.
- This application was written with React.js and the Moment.js library.

Pigright

- This application where you can track your sales.
- Add 3-steps registration form.
- Create 3 pages to app.
- This application written in React.js and Redux.
- There were graphs for working with them, I used d3.js.

PR Volt

- PR Volt automates and amplifies your PR campaigns, giving you the press coverage you need.
- Support app, fix bugs, add new features.

Employees

- This project is about render employees with the ability to go to the page of a specific employee and receive data on the time of his work.
- On this project, I decided to try and learn Typescript.
- Server data has been simulated by promises.
- Sorting and filtering of data has been done.
- The application is written in React js + Redux + Typescript.

Logistics

- This full stack project is about render shipments.
- On server side I used Express and MySQL as a database.
- Pagination has been done.
- Sorting and filtering of data has been done.
- The application is written in React js + Redux + Express + MySQL.
- The app is covered in unit tests.

Objective

Frontend developer. I have been doing web development for 3 years. I always open to learning new things and moving forward. I'm a proactive person, who likes to see results and be responsible for decisions. Also, I'm competitive and like to excel at everything I do. I approach duties with focus commitment and diligence.
